Komu

 Pokud se vyskytly potíže se zobrazením této zprávy, kliknutím sem ji zobrazíte ve webovém prohlížeči.

Dear all,

Based on EU directive 2011/62/EU (Falsified Medicines Directive) alerts have been generated. Since we need to provide immediate investigation of all potential incidents of falsification flagged in the system in accordance with Article 36(b), we would like to ask you for feedback on these alerts.

For most effective way the alerts showing similar signs have been grouped as they may have been created by the same cause. Please open the link below for displaying all the alerts in the group. Select all or only some of them in case not all alerts in the group have the same resolution and click on one of the feedback buttons.

You may have processed some of the alerts already which is indicated by their status. If you do not want to change it, check the **Hide processed** checkbox and only new alerts in the group will be shown.

Open the alerts [here](#).

📄 Export to Excel

Selected only

- Requested additional information are available through clicking on the alert in the list or in Excel exported data
- Choose closure of only selected alerts or all displayed alerts – the total number shown in the text on the buttons
- Export data to excel format to access full filterable
- Closing an alert with feedback choice different from the previously closed alerts leads to exclusion of the alert from the group and the alert is removed from the list

Select action:

Alert solved, Issue closed (Investigation completed)
Alert solved, Issue was caused by one of the stakeholders (Investigation completed)
Additional information about alert needed
MAH verified potential falsification (Investigation completed)
Alert is being investigated
Alert solved, Medicine was produced before February 9, 2019
Alert solved, Issue was caused by MAH/OBP and cannot be resolved (Investigation completed)
Alert solved, Exemption of the Ministry of Health applies (Investigation completed)

Approve all (2) Approve selected (0)

Export to Excel Selected only

➤ Choose from the feedback options as you would in an alert email

Feedback

[Alert solved, Issue closed \(Investigation completed\)](#)

When to use

This feedback will lead to closure of alert as 'solved'.

Falsification is excluded. Issue was closed.

For example: *Data not loaded, wrong data loaded, invalid data (not-accepted characters, invalid date), MAH did not further act on rejected files/records, rejection of not-accepted data, wrongly applied transactions, ...*

[Alert solved, Issue was caused by one of the stakeholders \(Investigation completed\)](#)

This feedback will lead to closure of alert as 'solved'.

Falsification is excluded. Alert was caused by one of the stakeholders.

[Alert solved, Issue was caused by MAH/OBP and cannot be resolved \(Investigation completed\)](#)

This feedback will lead to closure of alert as 'solved'.

Falsification is excluded. Alert was caused by MAH/OBP and cannot be resolved.

[Alert solved, Medicine was produced before February 9, 2019 \(Investigation completed\)](#)

This feedback will lead to closure of alert as 'solved'.

Falsification is excluded. Alert was caused by the fact that the medicine was produced before February 9, 2019.

[Alert solved, Exemption of the Ministry of Health applies \(Investigation completed\)](#)

This feedback will lead to closure of alert as 'solved'.

Falsification is excluded. Exemption of the Ministry of Health of the Czech Republic applies.

[Additional information about alert needed](#)

This feedback will lead to further investigation by MAH.

All possible technical and procedural causes must be excluded before providing additional information. NOOL provides identification of end-user location to MAH based on requirement for further investigation.

[MAH verified potential falsification \(Investigation completed\)](#)

This feedback will lead to alert hand-over as 'confirmed potential falsification' to inform National Competent Authorities, the European Medicines Agency and the Commission.

The Delegated Regulation and the Q&A of the EU Commission indicate that only a 'verified falsification' needs to be escalated to the relevant National Competent Authority (NCA). This implies that a process is required that would exclude all possible technical and procedural causes before a 'confirmed falsification' is communicated to the relevant NCA.

[Alert is being investigated](#)

This feedback will report that MAH has started investigation.

Please use this option only if you anticipate that the investigation will take more than 9 days from the alert creation.
