

LETTER OF ANNOUNCEMENT
EU Hub Release 1.7 information for OBPs

17th February 2020

Dear all,

EMVO can now officially announce Release 1.7 of the EU Hub, which is planned to go live by the end of April 2020.

Release 1.7 will bring the following functionalities:

- Introduction of 2 new reports for NCAs and Parallel Distributors regarding the supervision of repackaging activities, namely the 'Linking Report of a re-packaged Batch' and the 'Linking Report of Batches'.
- Re-design of the Intermarket Transactions (IMT) to guarantee that end-users are consistently reported with the accurate status of a given pack.
- Increased performance of the Pack Disclosure Report.

Release 1.7 will not impact the OBP and the National Systems interface but there will be a new version of the OBP SDK that will include the names of the new reports as well as its parameters and will be shared in due time.

Additionally, please be informed that the 2016 schema of the OBP Interface **will no longer be supported as of EU Hub release 1.7**. If you are still using the 2016 schema, please switch to the 2018 schema before mid-April 2020.

If you are not aware of whether you are using the 2016 schema, we recommend that you consult with your IT provider/department and take appropriate action accordingly.

EMVO will communicate on the latest status of the deployment of Release 1.7 as well as any other relevant information in good time.

In the event of any questions or uncertainty, please do not hesitate to contact our Helpdesk:
